DESCRIPTORS: *Magnetic storms, *Terrestrial magnetism, *Ionospheric disturbances, Arctic regions, *Meteorological charts

Based on the material of the Soviet high-latitudinal observatories and drifting stations synoptical charts of magnetic disturbances (r_H) for 1957 - 1958 were made. There are given mean two-hour charts for 1957 and some examples of successive hourly charts of disturbances. There is found to be a considerable variation of disturbance distribution in the universal time. This distribution is characterized by the existence of sepa-

SUBJECTS: *Terrestrial magnetism, *Magnetic [illegible] regions, Periodic variations, Measurement

The secular geomagnetic variations for the 1957-1959 period were drawn using the data of the USSR Antarctic magnetic observatories. The attention was drawn to the great amplitude of the long-period variations in the components, superposed on general secular variations. The range of the secular variation (rate of change) and Vostok observatories were noticed. (Author)
